Iceland communicates via base stations

Overview

Does Iceland radio offer satellite communication?

Iceland Radio offers satellite communication service to aircrafts through IRIDIUM and IMMARSAT. When HF conditions deteriorate, a satellite communication can be applied. If the aircraft is equipped with a satellite phone on board, pilots can call Iceland Radio centre when necessary.

What frequencies does Iceland radio use?

From Iceland Radio, aeronautical communication service is provided every day for 24 hours through HF and VHF GP frequencies. VHF service is continuous over the North Atlantic Ocean with COM equipment located in Iceland, Greenland, and the Faroe Islands. Operating frequencies are VHF 126.550, VHF 127.850, and VHF 129.625.

Can Iceland radio call aircraft?

Moreover, Iceland Radio can call aircrafts equipped with a satellite phone. Aircrafts can request a phone patch to their company dispatch unit or to Medlink when necessary. Through HF and landline interconnection, Iceland radio can call and connect an aircraft to their company dispatch unit or to Medlink.

What is the current status of broadband in Iceland?

1. ICT background and current status of broadband Iceland is one of the world's most advanced and mature markets when it comes to the infrastructure, diffusion, and use of ICTs. The government first recognized the potential of ICTs as early as 1996 in the "Icelandic Government's Vision of the Information Society" document¹.

Where is Iceland located?

Iceland Unifies National Radio Communications using Motorola IP-based TETRA Solution Situated mid-way between North America and mainland Europe,

Iceland is an island in the North Atlantic covering a total area of 103,000km².

How will 5G technology improve the telecommunications network in Iceland?

Through a Memorandum of Understanding signed in the same month, the two parties also announced their intention of extending the cooperation on 5G technology to realize the best telecommunications network in Iceland in terms of radio coverage, stability and bandwidth to ensure the reliable service quality and the enhanced experience.⁵⁶
