

## SolarInvert Energy Solutions

# New Energy Charging Station Energy

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

## Overview

---

Are recharging units certified new energy electricity?

With this batch of facilities, we can say that the electricity powering these recharging units is certified new energy electricity," said Tang Xiaodong, head of the municipal platform for public data collection and monitoring of charging and swapping facilities in Shanghai.

How many charging stations are there in Shanghai?

There are 196,000 public charging stations and up to 518,100 households of private charging stations across Shanghai to ensure the daily operation of new energy vehicles, according to the State Grid Shanghai Municipal Electric Power Co.

How can China promote the development of Nev charging stations?

China has successively formulated and issued many measures for this short board, providing firm system guarantees and funding support to promote the development of NEV charging stations. Technical innovation for NEV charging stations is an important way to drive the development of this field [8, 9].

How many charging stations will CNPC build in China?

CNPC, together with Shanghai Qiyuan Green Power Tech Co Ltd and Shanghai Enneagon Energy Tech Co Ltd, hold shares in the joint venture. The company said earlier that it aims to build over 1,000 charging stations by 2025 in China, having built 203 as of September.

How can City's New charging facilities boost green power consumption?

These charging facilities are among the city's latest efforts to boost green power consumption through the creation of a new energy system that is clean, low-carbon, safe and efficient.

What are 'green charging piles' in Shanghai?

Up to now, the "green charging piles" in Shanghai have covered multiple business scenarios such as bus dedicated charging stations, fast charging stations for new energy vehicles, commercial building public charging stations, airport charging stations, etc.
