

## SolarInvert Energy Solutions

# Ordinary Battery Cabinet Ranking

## Overview

---

Can a lithium-ion battery cabinet withstand a fire?

To ensure proper safety for lithium-ion batteries, the storage cabinet must withstand an internal fire for at least 90 minutes and be tested and approved to SS-EN-1363-1 for internal fire. It is also essential that the cabinet has integral ventilation.

How to choose a lithium-ion battery cabinet?

When choosing a lithium-ion battery cabinet, consider the following features: A purpose-built cabinet should have high-specification features, such as metal-encased and grounded electrical outlets. The socket strip should be mounted on the rear wall of the cabinet for easy access. Proper alarm systems are important for lithium-ion battery-powered bikes, tools, and other electronics, which are often used during the day and charged at night.

Are lithium-ion batteries rated for fire?

Lithium-ion batteries should be stored in cabinets that are rated for fires starting from inside the cabinet. These cabinets must withstand an internal fire for at least 90 minutes and be tested and approved to SS-EN-1363-1 for internal fire protection.

How safe is the storage of lithium batteries?

Proper storage of lithium batteries is crucial for better protection from thermal runaway, fire, and toxic gas emissions. Ensure your storage maintains a constant temperature, protects against moisture, offers safe charging, and shields against mechanical damage. Regulations may not be keeping up with the safety needs for safe lithium battery storage.

Can a storage cabinet be used as a charging station?

If a battery storage cabinet is likely to be used as a charging station, it should be built explicitly for this purpose and include all the critical safety measures

needed from the outset. It can be more expensive and dangerous to connect charging facilities yourself at a later stage.

Where should a battery cabinet be placed?

A battery cabinet should be placed near an exit so it can be easily moved outside in case of a fire inside the cabinet.
