

SolarInvert Energy Solutions

Oslo buys uninterruptible power supply

Overview

What is the continuity of electricity supply in Norway?

The continuity of the electricity supply is depends on both the frequency and the duration of interruptions in the supply. In Norway, continuity of supply is stable and very good, and is close to 99.99 % in years without extreme weather events. It has never dropped below 99.96 % in any year since 1996, see the figure below.

How does Norwegian power supply differ from other European countries?

Hydropower accounts for most of the Norwegian power supplies, and the resource base for production depends on the precipitation in a given year. This is a significant difference for the rest of Europe where security of supply is mainly secured through thermal power plants, with fuels available in the energy markets.

What is security of electricity supply?

Security of supply means the ability of the power system to provide end users with an uninterrupted supply of electricity and a specified quality of supply, and includes energy security, adequacy and operational security. Security of electricity supply is vital for a modern society, and requires a smoothly functioning power market.

How good is continuity of supply in Norway?

In Norway, continuity of supply is stable and very good, and is close to 99.99 % in years without extreme weather events. It has never dropped below 99.96 % in any year since 1996, see the figure below. Extreme weather events affect continuity of supply.

Does Norway have a good power system?

Norway has a sound power balance and high power trading capacity, and therefore enjoys high energy security in the power system. Nevertheless, low

water inflow and events outside Norway can make the situation difficult at times. Statnett is responsible for developing measures to deal with highly strained power situations energy situations.

Why does Norway have a large storage capacity?

The large storage capacity makes it possible to even out production over years, seasons, weeks and days, within the constraints set by the licence and the watercourse itself. Norway has a sound power balance and high power trading capacity, and therefore enjoys high energy security in the power system.
