

SolarInvert Energy Solutions

Outdoor power generation

Overview

Can a wearable awudeh generate electricity sustainably outdoors?

Here, this study demonstrates a wearable, breathable all-weather usable dual energy harvester (AWuDEH) capable of generating electricity sustainably outdoors under varying weather conditions, including both sunny and rainy scenarios.

Can an all-day solar power generator generate electricity?

In this study, we propose an all-day solar power generator to achieve highly efficient and continuous electricity generation by harnessing the synergistic effects of photoelectric-thermoelectric conversion and latent thermal energy storage.

Are sustainable power sources important for outdoor wearable devices?

This research was supported by the National Research Foundation of Korea (NRF) (RS-2024-00343512, RS-2024-00416938). The authors declare no conflict of interest. ABSTRACT Sustainable power sources for outdoor wearable electronics are essential for the continuous operation of wearable devices.

What is an all-day solar power generator?

The all-day solar power generator exhibits an average open-circuit voltage of 6.8 mV during daylight and a remaining 0.9 mV during nighttime. Importantly, the all-day solar power generator achieves dependable outdoor power supply for communication transmission in diverse environmental scenarios.

Do outdoor wearable devices need energy harvesters?

An innovative energy harvester that can consistently provide electricity to outdoor wearable devices, irrespective of weather conditions, is essential. Without such a solution, relying on separate energy harvesters tailored for specific weather conditions would result in considerable inconvenience and effort.

Is wind power a good option for off-grid energy?

In the end, wind power can be an excellent addition to your off-grid arsenal, especially when paired with solar. It's like the peanut butter to solar's jelly – together, they make a perfect energy sandwich.
