Quick Tool Battery Life

**High Voltage
Solar Battery**

Overview

How long do power tool batteries last?

Power tool batteries last for several years. With proper care and storage, you can extend battery life and your investment. Here's what you need to know about caring for your cordless rechargeable battery. Cordless power tools don't always get the best of treatments.

What voltage should a tool battery be discharged at?

There will always be some voltage left even when the battery pack no longer runs your tools. They are considered discharged at 1.1V per cell. Using the tool is the safest way to discharge these types of batteries. NiMH batteries have a higher capacity, so they hold more power, but they let it out at a similar rate to the Cadmium batteries.

Do rechargeable power tool batteries corrode?

When your rechargeable power tool batteries have reached the end of their life do not throw them in the trash. As batteries corrode, their chemicals soak into the soil and contaminate groundwater and surface water. Lithium batteries could even cause a landfill fire. Be responsible and take them to your local hazardous waste pickup.

What is the difference between NiMH and lithium ion power tool batteries?

NiMH batteries have a higher capacity, so they hold more power, but they let it out at a similar rate to the Cadmium batteries. They will be fully discharged at 1V per cell. A lot of newer Lithium-Ion power tool batteries have an indicator on the battery.

How long does a lithium ion battery last?

Cycle durability: 500-1000 cycles Lithium-ion = Li-ion The newest type of power tool battery is the Lithium-ion battery. A good thing to note is Lithium, as compared to Lithium-Ion, is not a rechargeable type. Li-ion batteries can

deliver up to 3.6 V, three times higher than Ni-Cd or Ni-MH.

Are cadmium batteries still used in power tools?

Even though Cadmium has been banned, since 2006 in the EU, there were exemptions for power tools in the U.S.A until 2016. You can still buy NiCd regular and rechargeable batteries, but they should no longer be supplied in your power tools. Big manufactures are fazing them out compltely by 2022
