

SolarInvert Energy Solutions

Russian Smart Solar System Application

Overview

What are the prospects for solar energy in Russia?

Prospects for solar energy are very high for some regions. These include: areas surrounding the Black and Caspian Seas. According to the operator of the Unified Energy System, the share of electricity produced by solar energy in Russia is 0.03% of the total.

Where in Russia will a solar power plant be built?

In other parts of Russia, in particular, in the city of Narimanov, it is planned to build a solar power plant with a capacity of 25 million kWh/year. The Far East is not far behind. To meet the energy demand, a solar power plant with a capacity of 40 MW is planned to be built in the Republic of Sakha.

Does Russia have a smart metering program?

In Russia, no special programs for informing consumers, and especially for their training or practical preparation for the operation of smart metering systems, have not yet been developed.

Can a smart grid be implemented in Russia?

However, in practice, the implementation of a smart grid may not include the use of all technological capabilities and be limited only to a small set of technical solutions that solve the most pressing problems for a grid company. This is the situation that is now more typical for the development of smart grids in Russia.

Do solar panels work in Russia?

In Russia, such a system does not work. However, if solar panels produce more energy than needed, it can be stored in batteries. In order to calculate the number of solar panels to supply the house, you need to find out how many kW were spent during the month.

How many solar power plants are there in Russia?

Today, there are more than 10 solar power plants in Russia, which produce a total capacity of 72.5 MW. Now there is an active consideration of projects for the construction of power plants on the territory of the Crimean peninsula. To make it energy-independent, it is necessary to generate an additional 2.5 billion kW.

Russian Smart Solar System Application

DETAILS AND PACKAGING

- 1 USER MANUAL PDF
- 2 RJ45 Cable For RS485/CAN
- 3 Battery in Parallel Cables
- 4 RJ45 TO USB Monitor Cable
- 5 M8 Terminal*4
