# SenegalWorldSolarPhotovoltaic Panels

## Overview

---

How many people in Senegal will get solar power?

Nearly 540,000 people in Senegal will get access to clean and affordable power following the launch of two solar photovoltaic (PV) plants, financed by IFC, the European Investment Bank and Proparco, under the World Bank Group's Scaling Solar program.

Does Senegal need a solar power plant?

Senegal's power sector has been historically reliant on costly fuel imports, with about 80 percent of its energy mix being oil-based. "The Kael and Kahone solar power plants exemplify our commitment to supporting Senegal's transition to cleaner, more affordable energy, while creating business opportunities for local communities.

How much does a solar power plant cost in Senegal?

The paired solar power plants cost \$40.77 million, providing electricity to 540,000 people at under four cents per kWh – not only the cheapest energy in Senegal but among the most cost-effective across sub-Saharan Africa.

Can Senegal develop 60 megawatts of solar power?

The government of Senegal has been working with the World Bank Group to develop 60 megawatts of solar power through Scaling Solar. According to World Bank data, over 70% of the population of Senegal currently has access to electricity.

Will solar be Senegal's cheapest energy source?

The planned Scaling Solar projects underscore Senegal's commitment to integrating renewable energy resources into its energy mix. The successful tender set a new benchmark for the region. With prices under 4 US cents per kWh, solar energy will become Senegal's cheapest energy source. Questions or Interest?

.

When will Kael & Kahone solar plants be available in Senegal?

Meanwhile, the Kael and Kahone solar plants came online in May 2021, developed by Engie and Meridiam following competitive tendering by Senegal's Energy Regulatory Commission, financed by the International Finance Corporation, European Investment Bank, Proparco and Senegalese sovereign wealth fund, FONSI.
