Solar Electricity System in Burkina Faso

Overview

The Government of Burkina Faso has signed a Public-Private Partnership (PPP) agreement with a local developer and a Dutch clean energy investment firm to develop a major solar and battery storage system. How much solar energy does Burkina Faso have?

larly solar energy. Burkina Faso benefits from daily sunlight of 5.5 KWh/m² for 3000 to 3500 hours per year, with a uniformly distributed solar resource across the national territory, yielding an.

Does Burkina Faso have electricity?

Bondukuy and Djigouera are small villages in the south near Bobo-Dioulasso. In the many small villages of Burkina Faso, there is usually no electricity, although every now and then you will see a solar panel or rechargeable car battery running a television or stereo, and you might find an occasional gas-operated refrigerator.

Does the United States support energy transactions in Burkina Faso?

In addition, various firms have received U.S. Embassy support to move transactions forward. The page below gives an overview of the energy sector in Burkina Faso, and lists Power Africa's financially closed transactions in the country, some of which are already online and generating critical electricity supply for the people of Burkina Faso.

What changes have been made in Burkina Faso since the last iteration?

UNCILMajor changesSince the last iteration, significant progress has been made with the successive commissioning of new solar power plants in Burkina Faso in 2024, and the continuation of electrification efforts despite the security crisis. The national coverage rate has increased to 50%, compared to a national electrification rat
