

## SolarInvert Energy Solutions

# Spanish Gigawatt New Solar Company

## Overview

---

Renewable energy producer Sonnedix has surpassed its first gigawatt of owned and operated capacity in Spain. What is Sonnedix's first gigawatt capacity in Spain?

Renewable energy producer Sonnedix has surpassed its first gigawatt of owned and operated capacity in Spain. This milestone was reached following the inauguration of the Betierra project, located in Cuenca and consisting of three solar PV power plants with a capacity of 50 megawatts peak each.

How many solar farms are there in Spain?

The massive solar cluster is located just outside Seville in southern Spain and is made up of five solar farms. Together, they have a total capacity of 263 megawatts (MW) – enough to generate 515 gigawatt-hours (GWh) of clean electricity each year. That's about as much power as 150,000 homes in Spain use annually. Even better?

.

How can Spain achieve 80% renewable electricity by 2030?

Project supports Spain's clean energy ambitions, helping drive the national goal of 80% renewable electricity by 2030. Long-term PPAs and 800 new jobs demonstrate commercial and socio-economic viability of large-scale renewables.

How is Spain harnessing the power of solar energy?

Spain, with its abundant sunshine, is harnessing the power of solar energy through top solar Engineering, Procurement, and Construction (EPC) companies. This article puts the spotlight on three major EPC players in the Spanish renewable energy sector, shedding light on their specialties, portfolio capacity, and locations. 1.

What is the Seville solar project?

TotalEnergies' Seville solar project adds 263 MW of capacity, pushing its global renewables footprint toward a 35 GW target by end-2025. Project supports Spain's clean energy ambitions, helping drive the national goal of 80% renewable electricity by 2030.

Why should Spain invest in solar power?

Plus, by adding more solar power to the local grid, this project can strengthen grid stability and reliability, which helps avoid power shortages and outages. This initiative supports Spain's energy independence by reducing reliance on imported fossil fuels from other countries that pollute the air and contribute to climate change.
