Taipei Energy Storage Equipment Joins BESS

Overview

Which large-scale Bess has been commissioned in Taiwan?

This becomes the latest large-scale BESS to be commissioned in Taiwan. Indeed, last year, electric vehicle (EV) and energy storage technology firm NHOA commissioned a 120MWh BESS in Taiwan for its parent company, Taiwan Cement Corporation (TCC).

Where is a battery energy storage system located in Taiwan?

Image: Fluence. System integrator Fluence has supplied a 60MW/80MWh battery energy storage system (BESS) in Taiwan, which has started commercial operations. State-owned utility Taiwan Power Company (Taipower) deployed the project, and is located at the Taoyuan Longtan ultra-high voltage substation.

What is Taipower's largest Bess project?

Fluence said it is Taipower's largest BESS project to-date, part of the utility's move to have 1,000MWh of energy storage on its network by 2025. A large amount of offshore wind is expected to be deployed in Taiwan in the coming years, and energy storage will play a crucial role in integrating its intermittent generation into the electricity grid.

Which energy storage technology providers are active in Taiwan?

Several energy storage technology providers, such as Fluence, flow battery manufacturer Invinity and NHOA, are active in the market. It is worth noting that the Taiwan energy storage market is set to become a focus for Billion Electric with plans to develop 1.2GWh local battery system production capacity.

Is a 60mw/80mwh battery energy storage system available in Taiwan?

A 60MW/80MWh battery energy storage system (BESS) in Taiwan, supplied by system integrator Fluence, has gone online.

Will Taiwan need 90gw of energy storage by 2030?

TCC chairman Nelson Chang said in 2022 that Taiwan will need 90GW of energy storage by 2030 to integrate new renewable energy capacity. Several energy storage technology providers, such as Fluence, flow battery manufacturer Invinity and NHOA, are active in the market.
