Tender for grid connection of inverter for Tiraspol communication base station

Overview

How does tenderbase work?

TenderBase grabs fresh notices every day from TED, converts them into OCDS releases and stores it in its database. Note that only those notices are being processed which are using the newer TED-XML (2.0.9) schema. The API provides an easy way to access release and procurement process information in JSON format, using OCDS.

Which RTV coating should be used in a substation?

substations where creepage distance is considered as 31mm/kV shall be with Silicon RTV coating. The price of RTV coating shall be included in the installation cost of respective equipment. 34.

What if MQP/ITP/fat is not approved by Powergrid?

Contractor shall ensure that order for items where MQP/ITP/FAT is required will be placed only on vendors having valid MQP/ITP/FAT and where the supplier's MQP/ITP/FAT is either not valid or has not been approved by POWERGRID, MQP shall be generally submitted as per POWERGRID format before placing order.
