

SolarInvert Energy Solutions

Time for the release of energy storage photovoltaic in France

Overview

France puts its energy roadmap out for final consultation by early April 2025. Adjustments to photovoltaic targets are expected, following feedback from consultations launched at the end of 2024. What is solar power generation in France?

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.

How much solar power will France have in 2022?

France installed solar PV capacity at the end of 2022 sat at 15.7GW, of which 2.6GW was added during last year and accounted for more than half of the total renewable capacity added in 2022, which reached over 5GW. Among other updated target is France's plan to add between 5.5-7GW of solar capacity per year.

Is France a European solar powerhouse?

by Catie Owen | Feb 11, 2025 | Market Reports | 0 comments France is emerging as a European solar powerhouse, with capacity surging to 17.1 GW in 2022 and a goal of 100 GW by 2050. This report explores the country's innovative policies, groundbreaking technologies like floating solar farms, and the key players propelling the industry forward.

Does France have a solar energy sector?

The exponential growth of the solar photovoltaic energy sector in France has never stopped since its inception in the early 2000s. In 2023, the PV energy capacity in France amounted to approximately 20.5 gigawatts, making France the fifth European country for cumulative PV capacity that year.

Will France increase its solar capacity by 2035?

By 2035, France aims to increase its cumulative installed solar capacity to between 75-100GW, although this could be a lesser increase compared to neighbouring countries such as Spain and Italy, which are targeting installations of 76GW and 80GW of solar PV by 2030, respectively.

Why should you attend Solar & Storage live Paris?

Explore the benefits of attending Solar & Storage Live Paris – taking place 5-6 November 2025. France is emerging as a European solar powerhouse, with capacity surging to 17.1 GW in 2022 and a goal of 100 GW by 2050.
