Value of photovoltaic panels in Greece

CONTAINER TYPE ENERGY STORAGE SYSTEM

Energy storage system

FC RoHS CE 

Overview

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

How much does a solar system cost in Greece?

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about €8,600, or €6,450 after the federal solar tax credit of 25% is applied.

Why are solar panels so expensive in Greece?

Global demand, industrial accidents, environmental disasters, exchange rates and the impact of the coronavirus pandemic could all be contributing to a rapid rise in the cost of solar power panels in Greece since the beginning of July. Industry sources reported price hikes of up to 25%.

Does Greece have high energy production potential for PV power plants?

Greece has high energy production potential for PV power plants. This paper presented an extended study for placement of a 20 kW PV power plant in Greece. The long-term meteorological parameters for each of the considered sites are analyzed and the results corroborate that Greece has a high content of solar radiations throughout the year.

Is Greece a good market for solar energy?

Greece become an economically highly attractive market for grid-connected

PV systems, given the unique combination of high solar irradiation values and an exceptional feed in tariff. The increasing energy needs of Greece lead inevitably to the development of new methods for the production of energy from renewable sources.

Why are investors worried about solar power in Greece?

Investors in solar power in Greece are concerned because of a sharp rise in prices for the equipment in the past two months, reversing the declining trend in the cost of photovoltaic technology registered over the past years, according to a local media report. Developers told Energypress the jump ranged from 10% to 25%.
