Wellington Outdoor Power Plant

Overview

What is Wellington North solar farm?

Wellington North Solar Farm is a ground-mounted solar project which is planned over 970 hectares. The project is expected to generate 700,000MWh electricity and supply enough clean energy to power 125,000 households. The project is expected to offset 560,000t of carbon dioxide emissions (CO₂) a year.

Where are wind farms located in New Zealand?

It gets pretty blustery in New Zealand - which is good news for us wind farmers. We have six wind farms spread from Waikato to Southland, plus the iconic, solitary wind turbine in Brooklyn, Wellington. We've also designed and built a wind farm at Ross Island in Antarctica that provides power to Scott Base and McMurdo research stations.

Where is a new power plant being built?

It is planned in New South Wales, Australia. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the under construction stage. It will be developed in a single phase. The project construction is likely to commence in 2022 and is expected to enter into commercial operation in 2024.

How many power plants are there in the world?

According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the under construction stage. It will be developed in a single phase. The project construction is likely to commence in 2022 and is expected to enter into commercial operation in 2024. Buy the profile [here](#).

Where can I bike in Wellington?

Two mountain biking tracks, designed and constructed by Wellington

mountain bikers Jonathan, Paul and Simon Kennett, provide some wonderful challenges for keen mountain bikers. Public access to the recreation area is via Opau Road. Car parking is available for 60 cars. Please note that dogs are not allowed in the recreation area.
